برنامج رائع لحذف البرامج حتي جذورها بعد عمليه التسطيب برد على والمنطقة المنطقة المنطقة التي المنطقة التي المنطقة التي المنطقة والمنطقة المنطقة المن

Total uninstall - a tool to completely remove the programs installed on your system, which includes analysis of the installed software modules and monitor any changes in the system when you install new programs. In the first phase of the utility keeps track of changes in the system during the installation of new software, takes a snapshot of the file system and registry prior to the installation of an application and after. In the future, based on the collected at the time of installation of data, the utility will quickly and help you remove unwanted program. The interface of this program is not congested, all the steps set through dialogues. In general, we can say that this is a very useful tool for those who are constantly install and uninstall the program. In addition, the program has an easy to use interface, which is translated into several languages.
