

## Norton 360 2012 6.1.2.10

### What's New in norton 360 6.0 Final :

- \* Industry-Leading Layered Security helps protect you against advanced threats through a combination of definitions and heuristic and behavioral technologies give you confidence that your PC is secure .
- \* Network Monitoring protects your home network against unauthorized access by detecting whether your connected wireless network is secure or not secure, providing you with a visual picture of your network and each device that is connected to it and let's you view the security status of the norton protected computers on the network.
- \* Backup provides for new backup destinations including HD-DVD and Blu-Ray disc and iPods, while continuing to support the widest range of mapped and networked storage drives and an included 2GB of online storage, providing more options for backup than any other product in its class
- \* Registry Cleaner helps optimize performance by removing unneeded Windows registry files to help keep your computer healthier and running more efficiently.
- \* Phishing Protection for Firefox: Phishing Protection guards online attempts to steal your personal information using real-time analytics to identify and block fraudulent web sites, and now supports both the Firefox and Internet Explorer browsers.
- \* Diagnostic Report provides a convenient system snapshot for easier troubleshooting and problem diagnosis of any PC issue by collecting detailed system information including operating system, installed applications, startup applications, hardware configuration, and more and delivers it to you in a viewable, printable format that you can save or email to whomever you go to for help.
- \* Fast, Easy Access to Settings and Tasks means that although norton 360 does all the work for you automatically and quietly in the background, you can choose to do things manually such as run a scan, modify a backup job, query status, check for the latest updates, or just do some cleanup and optimization
